

GENERAL MANAGER INSTRUCTION 01/2022

Segregation and Separate Confinement Locations

This General Manager Instruction provides authorisation for additional locations to be used for segregation and separate confinement.

The *Management of Segregation and Separate Confinement Policy Annex A* sets out the authorised locations for segregation and separate confinement. Due to operational factors including the current use of Management Unit for COVID segregation and the return of female detainees to accommodation in WCC compound, the identified locations are currently insufficient. This General Manager Instruction remedies this by authorising additional locations as listed on sharepoint: Segregation and separate confinement locations. This list will be updated as required.

At the time of releasing this GMI, the following locations are authorised for use for segregation and separate confinement:

1. Management Unit
2. CSU
3. SCC West
4. AU West
5. WR2

For the purposes of investigative segregation detainees may be segregated in their accommodation areas. Where a detainee is segregated in their accommodation area for investigative segregation, the segregation location must be reviewed by the SD Operations or in their absence, the Duty Manager in the review of the segregation order within three (3) business days in accordance with section 9.1 of the *Management of Segregation and Separate Confinement Policy*.
